

Completing a CLS Request

A step-by-step guide for agency writers and approvers • Beacon Performance & Budgeting

What is a CLS request?

A Current Level of Service (CLS) request asks BBMR to fund the cost of maintaining your agency's current level of service in the coming fiscal year — for example mandated cost increases, cyclical costs, or extraordinary inflation. Each request is summarized by initiative/project, given a total amount, and then broken out by expenditure object.

The CLS Requests page

Request name Service Amount			 Submit for approval + Add CLS Request
Mandated fleet fuel increase	Fleet Management	\$412.0K	Delete Modify →
Export request(s): Excel PDF			

Figure 1. The list page: one card per agency. Add a request, sort by service or amount, submit for approval, or export.

Step by step

- 1 **Open the page.** In the left navigation under **Budget Planning**, choose **CLS Requests**.
- 2 **Add a request.** Click **Add CLS Request** to open the request page.
- 3 **Fill in the summary.** Give the request a name, pick the service it supports, choose the request type (use the info icon if unsure), and enter the request amount. Add FY29/FY30 amounts, or check **One-time request** to hide them.
- 4 **Summarize the request.** Write a 3–4 sentence explanation (required, 300-word limit).
- 5 **Break it out.** Under **Request details**, use **Add Details** to add one line per expenditure object until the line totals equal the request amount (watch the remaining-\$ note).
- 6 **Add positions (if needed).** Check **Add positions to this request** and complete the position fields.
- 7 **Submit.** Back on the CLS Requests page, click **Submit for approval** to send it to your Agency Approver.

The request page

← Back to CLS requests (reminder: send to your Agency Approver before the deadline)
Summary: Request name • Service • Request type (■ info) • Request / FY29 / FY30 amounts • One-time • Summarize (300 words)
Request details: remaining-\$ note, Add Details, one line per expenditure object
Position requests: shown after you check 'Add positions to this request'

Figure 2. The request page: the summary box, the expenditure-object breakdown, and the optional positions section.

How you'll know it's complete

Required fields turn **red** when left blank, and the summary word counter turns red if you go over 300 words. The remaining-\$ note confirms when your line items match the request amount. When everything is filled in and fully broken out, returning to the CLS Requests page shows a confirmation that the request has been justified. Only requests approved by your Agency Approver are reviewed by BBMR.
